Sir:

**COMMENTS ON EXAMINER'S AMENDMENT TO  
THE TITLE OF THE APPLICATION**

This communication is responsive to an Examiner's Amendment that accompanied the March 18 2008 Notice of Allowability and Notice of Allowance in the above-identified application. This paper is submitted contemporaneously with payment of the issue fee.

No action is requested by the Applicant. The Applicant wishes to place a comment on the record concerning an amendment to the title of the application that was set forth in the Notice

DOCKET NO.: 48378-0003-00-US  
Application No.: 10/621,711  
Notice of Allowability dated: March 18, 2008

PATENT

of Allowability. The title of the application was changed from "Transdermal Hormone Delivery System: Compositions and Methods" to --Skin Permeation Enhancement Composition for Transdermal Hormone Delivery System--. It is Applicant's view that the new title does not identify the invention as claimed as well as did the former title. The claims are directed to a transdermal hormone delivery system which comprises a combination of skin permeation enhancers. The new title suggests that the claims are directed to the skin permeation enhancer composition, not to the transdermal hormone delivery system as a whole.

To advance this application to issuance, Applicant agrees to the title change and requests no action pertaining thereto. However, this agreement is based on Applicant's understanding that the new title will not affect the interpretation of the patent's claims.

Respectfully submitted,

Janet E. Reed, Ph.D.
